PERSONAL PROJECTS

IPL Data Analysis using Tableau
(09/2021 - 10/2021)
- Indian Premier League(IPL) Dashboard, which is created on Tableau. Designed to analyze various metrics used in IPL pertaining to the teams, batsmen, bowlers and an overall phenomena (https://public.tableau.com/app/profile/bhavesh.chatnani)

HR Analytics Dashboard using PowerBi
(10/2021 - 10)
- Built a dashboard which that allows Human Resource teams to track, analyze and report on organization performance to improve employee retention.

Multiple Intersection Traffic Control System
(2020 - 2021)
- The aim of this project is to develop a traffic system which decides based on current traffic present on the road and aims to reduce the unnecessary waiting time spent on signals . We have used Reinforcement Learning.

Universal Medical Database using HL7
(2019 - 2020)
- Have created a website which allows us to store medical data and information into the universally standardized HL7 format, which can be implemented in hospitals and medical institutions.

Superstore Analysis using MS Excel
(08/2021 - 09/2021)
- Built several charts based on data available of an e-commerce site using pivot tables and formulae. The charts display profits, losses, based on regions, order type, dates, discounts and many more
